#### Searching for Projects: [mbex.org](http://mbex.org)

With over 3,500 projects provided to our members annually via our online plan room, we have done our best to make it easy to find projects that apply to your company via TWO search capabilities. To start a new search, visit the Filters tab at the top of the page and click the "+" button. To search for projects by CSI/division, select "Search only in spec index" and enter a CSI division (example: 09 for division nine) into the CSI division field. Premium users may also establish a keyword search of specifications based on Optical Character Recognition (OCR), which will scan through all of our project specs, giving direct links to your keywords within each project's spec book. To set up a SAM Search, press the "+" to create a filter, then enter specific keywords into the keyword fields and select "search in contents of the spec book". Finally, remember to save your searches, giving them a name that is convenient for you!
